About Us

AWJATECH Is A Saudi Technology Company Based In **Riyadh**. We Provide Reliable It And Digital Transformation Solutions Across The Kingdom.

We Support Organizations In Building Secure, Scalable, And Efficient Technology Environments Aligned .With Saudi Vision 2030

Vision

To Be A Trusted Technology Partner That Helps Organizations Grow Through Secure And Future-Ready .Digital Solutions

Mission

To Simplify Technology And Build Strong Digital Foundations That Enable Organizations To Operate .Efficiently, Innovate And Grow With Confidenc.

Our Five Pillars

1 Intelligent Connectivity

Secure And Modern Network Solutions.

2 Hybrid Cloud & Data Centers

Flexible And Scalable Infrastructure Solutions.

3 Software & Licensing Management

Cost-Effective And Compliant Software Solutions.

4 Managed Services

24/7 monitoring And Continuous Support.

5 Technical Expertise

Skilled Professionals Delivering High-Quality Implementation And Support.

Why Choose Us

- End-to-end integrated technology partner.
- Vendor-neutral advisory approach.
- Enterprise-grade security-first architecture.
- SLA-driven service delivery.
- Scalable solutions aligned to business growth.

Industries We Serve

- Government & Public Sector
- Banking & Financial Services
- Healthcare
- Oil & Gas
- Education
- Retail & Logistics
- Enterprise & Corporate

Core Service Portfolio

Digital Transformation Consulting

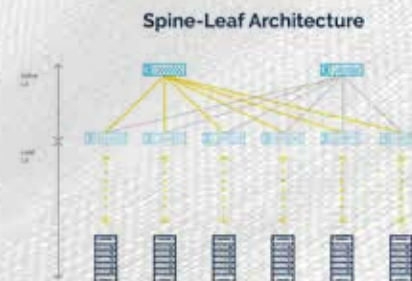

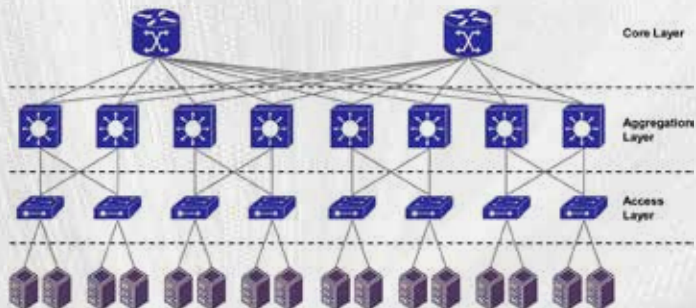

We align technology strategy with business objectives to drive innovation and measurable growth.

Services Include :

- Digital strategy & roadmap development
- Process automation
- Cloud adoption & migration
- IT infrastructure modernization
- Cybersecurity & governance frameworks
- Data analytics & performance intelligence

Networking, Connectivity & Data Center Infrastructure

End-to-end enterprise networking and physical infrastructure solutions.

A COMPLETE GUIDE TO ENTERPRISE NETWORKING

Enterprise Networking

- LAN/WAN architecture design
- AI-driven switching & routing
- Enterprise Wi-Fi deployment
- Zero-Trust segmentation
- Performance optimization

Structured Cabling

- Copper & fiber installation
- Backbone & horizontal cabling
- Testing, certification, and labeling
- Infrastructure remediation

Data Center Infrastructure

- Rack & cabinet deployment
- Power distribution & airflow management
- Rack elevation documentation
- Equipment staging & mounting

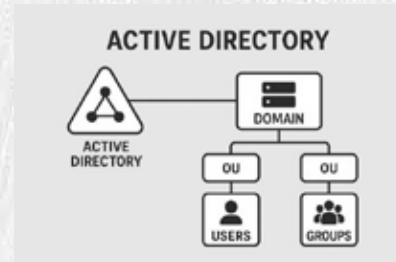

Managed Services – Identity, Microsoft 365 Network & Cloud

Proactive IT operations with 24/7 monitoring and SLA-driven performance.

Active Directory & Identity

- AD / Entra ID management
- MFA enforcement
- Policy optimization
- Zero-Trust identity support
- End-user support

Microsoft 365

- Exchange, SharePoint & Teams management
- License optimization
- Security & compliance enforcement
- Backup & retention governance
- Custom Professional emails. example : Sales@awjatech.sa

Cloud Managed Services

- Azure workload management
- Backup & disaster recovery
- Security posture monitoring
- Cost optimization

Google Workspace

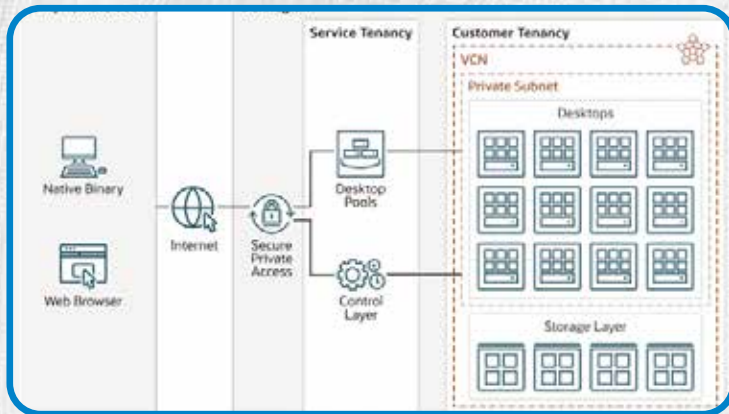

- Cloud-Based Productivity Suite For Modern Businesses
- Real-Time Collaboration Across Teams And Locations
- Secure File Storage And Sharing With Google Drive
- Professional Email Solutions Via Gmail
- Seamless Communication With Google Meet
- Smart Scheduling Using Google Calendar
- Document Creation With Google Docs, Sheets, And Slides
- Ai-Powered Tools To Enhance Productivity And Automation
- Enterprise-Grade Security And Admin Controls
- Accessible Anytime, Anywhere On Any Device

Network Managed Services

- 24/7 monitoring
- Firewall management
- Patch & firmware control
- Incident response

Managed OCI Tenancy Services

End-to-end management of Oracle Cloud Infrastructure environments.

Scope :

- Tenancy architecture & governance
- IAM & security zones
- Compute, storage & database operations
- VCN & connectivity management
- Cost governance & reporting
- 24/7 monitoring & SLA support

Managed Cybersecurity, SIEM & Firewall Services

Comprehensive threat protection and security operations.

SIEM Management :

- Log aggregation & threat correlation
- Real-time alerting
- Compliance reporting
- Incident escalation

Firewall & Perimeter Security

- NGFW configuration
- IPS management
- VPN & remote access
- Policy governance

SOC Operations

- 24/7 monitoring
- Threat response coordination
- Root cause analysis
- Executive dashboards

Technical Staffing Services – On-Site & Remote

Flexible staffing models delivering elite technology talent.

Permanent Placement :

- Technical recruitment
- Leadership placements
- Cultural & competency validation

Contract & Project Staffing

- Network engineers
- Cloud & DevOps specialists
- Cybersecurity analysts
- Microsoft & OCI engineers
- Data center technicians

Software Licensing

Strategic software acquisition and compliance governance.

Includes :

- Microsoft licensing (Microsoft 365, Azure, Server)
- VMware virtualization licensing
- Fortinet security solutions

Microsoft Copilot & AI Solutions

We provide licensing, deployment, and support for Microsoft Copilot and advanced AI solutions to enhance productivity and automation.

Integrated with Microsoft 365, Copilot improves document creation, data analysis, communication, and collaboration through intelligent automation.

Our AI services include workflow automation, chatbot integration, data intelligence, and custom AI deployments tailored to business needs.

Hardware Procurement & Deployment

Enterprise-grade sourcing and lifecycle management.

Scope :

- Servers & storage, PCs, and laptops
- Networking equipment
- End-user devices
- Vendor negotiation
- On-site deployment
- Warranty coordination

Unified Communication & IP Telephony Services

Enterprise telephony and collaboration solutions.

System Design & Deployment

- IP PBX systems (Yeastar, Grandstream, Cisco, 3CX, Avaya, Panasonic)
- SIP trunk configuration
- IVR & call routing design
- CRM integration

Managed Services

- 24/7 PBX monitoring
- Firmware & backup management
- Call analytics optimization

IP CCTV & Video Surveillance Services

Comprehensive surveillance infrastructure.

Design & Deployment

- HD IP cameras (fixed, PTZ, thermal)
- NVR & storage systems
- PoE infrastructure
- Access control integration

Monitoring & Maintenance

- 24/7 monitoring
- AI-based analytics
- Firmware updates
- Preventive maintenance

Wi-Fi & Wireless Network Solutions

Reliable and secure wireless connectivity powered by :

- Cisco enterprise solutions
- Ruijie offers high-performance Wi-Fi 6/7 access points, routers, and networking solutions for businesses and homes, featuring cloud management (Ruijie Cloud).
- Aruba (HPE) Wi-Fi 6/6E platforms
- Grandstream wireless systems

Services Include :

- Wireless site survey
- Access point deployment
- Secure configuration
- Guest Wi-Fi setup
- Coverage optimization
- Ongoing support

Access Control

We provide comprehensive Access Control solutions to secure your premises and streamline workforce management. Our services include door access systems, intercom systems, and fingerprint biometric solutions, with employee fingerprint attendance seamlessly integrated into your HR applications. This integration enables accurate time tracking, automated attendance records, and improved operational efficiency—while ensuring only authorized personnel can access your facilities.

Benefits

- Enhanced customer engagement and digital presence
- Streamlined business processes and automation
- Scalable solutions built for future growth
- Secure, reliable, and high-performance applications
- Our web and app development services transform ideas into intuitive, robust, and user-friendly digital solutions that help businesses stay competitive in a fast-evolving digital landscape

Web & Apps Development :

We deliver custom web and mobile application development solutions that empower businesses to engage customers, optimize operations, and drive digital innovation. Our team combines cutting-edge technologies with user-centered design to create scalable, secure, and high-performing applications tailored to your unique business needs.

Our Services Include :

- Custom website design and development (responsive and SEO-optimized)
- Mobile app development for iOS and Android platforms
- Progressive Web Apps (PWAs) for seamless cross-platform experiences
- E-commerce platforms and online marketplaces
- Backend systems, APIs, and database integration
- UI/UX design for intuitive user experiences
- App maintenance, updates, and performance optimization
- Cloud-based and hybrid application deployment

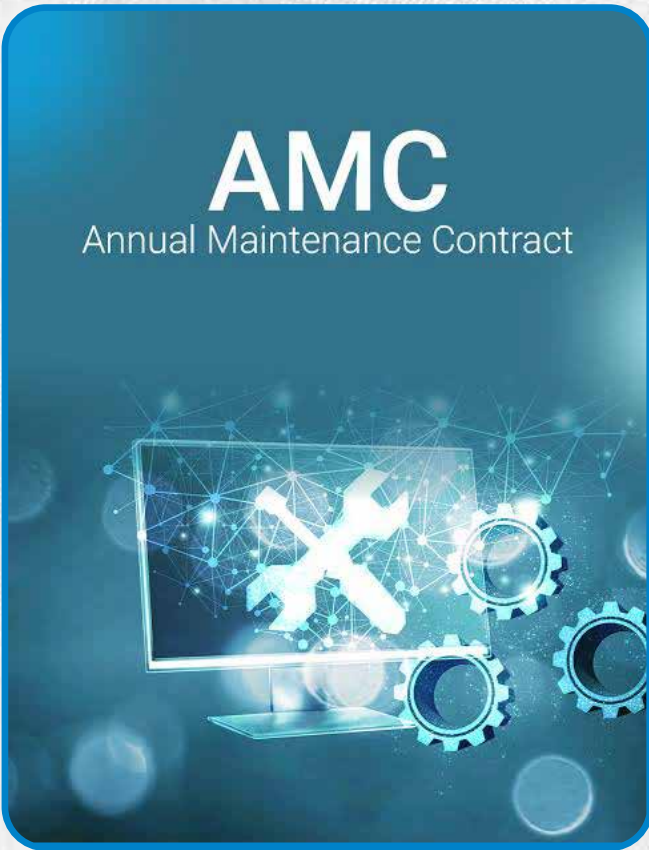

Products & Solutions

We provide comprehensive digital transformation and enterprise management solutions designed to improve operational efficiency, governance, and service delivery.

1. **Content & Archive Management**
A centralized system for managing digital and physical documents, enabling secure storage, indexing, retrieval, and compliance with regulatory standards.
2. **Visitor Management & Tracking System**
A smart system for registering, monitoring, and managing visitors to ensure security, compliance, and improved front-desk operations.
3. **Document Retention & Disposal Management**
A compliant solution for managing document lifecycle policies, including classification, retention scheduling, secure archiving and controlled destruction processes.
4. **Workflow & Business Process Management**
Automation of business processes and approval workflows to enhance productivity, reduce manual intervention, and ensure transparency across departments.
5. **Event Management System.**
A comprehensive solution for planning, organizing, managing, and tracking corporate events, conferences, and official functions
6. **Warehouse Management System**
Efficient inventory control and warehouse operations management, including stock tracking, reporting, and optimization of supply chain processes.
7. **Asset Management & Tracking**
A robust solution for tracking and managing organizational assets throughout their lifecycle, ensuring accountability and optimized utilization.
8. **Project Management System**
A structured platform for planning, executing, monitoring, and delivering projects on time and within budget, with full reporting capabilities.
9. **Field Operations Management**
A powerful solution designed to manage and monitor field teams, on-site activities, service assignments, inspections, task tracking, real-time reporting, and performance evaluation. The system enhances coordination between field staff and headquarters while improving operational visibility and response time
10. **Maintenance Management System**
A preventive and corrective maintenance solution to manage work orders, asset servicing, and maintenance scheduling.

AMC

Annual Maintenance Contract

Maintenance Contracts (AMC)

Reliable Support. Continuous Performance

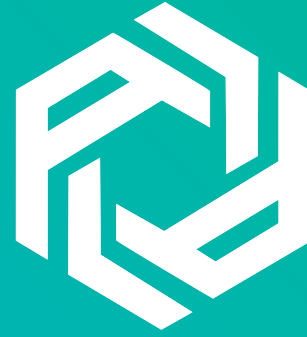

Services Include :

- Preventive & corrective maintenance
- On-site & remote support
- Network & server monitoring
- Troubleshooting & updates
- Emergency response

Our Value Proposition

We operate as a single strategic technology partner—integrating infrastructure, cybersecurity, cloud, software, and talent into a unified ecosystem. Our approach reduces complexity, enhances operational resilience, and delivers measurable business outcomes aligned with long-term growth.

We do not simply deploy technology—we architect secure, intelligent, and future-ready ecosystems that enable organizations to lead with confidence.
